URANUS

URANUS TRADING AGENCIES CO. LTD. (URANUS) was established in Baghdad in 1989 as one of **Al-Qabas Economical Group** Companies specializing in trading, agencies, and commercial activities of the group and the Iraqi market. URANUS was established as a result of the successful business and steps of the mother company (**Al-Qabas Contracting Co. Ltd**) with the need

to build up good relations with different manufacturers, vendors, and suppliers of equipment, goods, and materials, that are used in its projects. URANUS activities were expanded to the oil and gas sector upon the establishment of the sister company (**Al-Qabas Oil services Co. Ltd**).

Since its establishment, URANUS implemented many contracts for public and private sectors in Iraq and signed agency agreements with well-known international manufacturers and companies. URANUS's target is to be a reliable supplier of different materials and equipment to the Iraqi market sectors; public & private and sign long terms agencies agreements with most of the well-known international companies in different fields of business.

URANUS's Main Fields of Business

1. Water and Wastewater Treatment Sector:

Water and wastewater treatment projects is one of the main fields of business of the company URANUS because URANUS have provided the procurement services for many projects with all required parts, components, equipment, pipes, etc..., for water and wastewater treatment projects in different sizes and capacities.

Type of Products Which We Can Offer:

- * Softeners.
- * Filtration.
- * Reversed Osmosis for softened, drinking, brackish and sea water.
- * Ultra-Filtration.
- * Point Of Use Devices (POU).
- * POU Filtration Systems.
- * POU Drinking Water systems.
- * Booster Units.
- * Blow down Systems.
- * Water Storage Tanks.

All the above products and equipment are procured from best international manufacturers in this field from west Europe, US, Japan, etc..

Our Plans in This Field Aim To:

- Spread out and promote these products in the markets,
- Contribute to introducing the latest processing techniques to the markets,
- Achieve an equivalent access to high quality and competitive prices contenting our clients' desire.

Also, we assist our clients with their requirements for the water & wastewater treatment systems, projects. Our warehouse allows us to keep a large number of components and spare parts and Domestic Systems in stock, ensuring the best service and short delivery times.

2. Pipes, Fittings and Accessories

URANUS offers different types of pipes and all required fittings and accessories; for different uses such as Stainless steel pipes, Carbon steel pipes, Ductal Iron Pipes, GRP pipes & PVC pipes, etc...

3. Electrical Equipment

URANUS supplies all the equipment and cables for power generation and power distribution projects such as Electrical substations & Transformers.

4. Pumps for All Purposes:

URANUS offers high quality products for efficient, energy-saving pump solutions, new generation of pumps features, and full range of sizes and limitless scope for combinations to suit all projects specific needs such as:

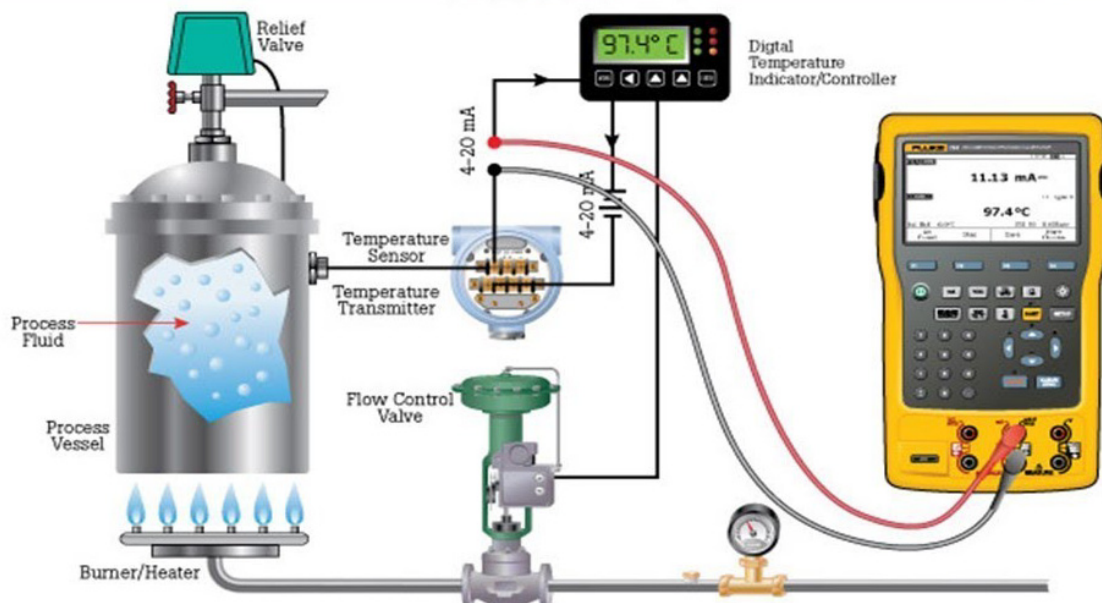

- Horizontal end-suction multistage pumps,
 - Vertical in-line multistage pumps,
 - Submersible pumps for water supply from water wells, agriculture, dewatering and industrial applications.
- Pumps and pumping systems for heating, air conditioning, cooling, pressure boosting, water supply and sewage disposal in domestic households, administrative and commercial buildings.

5. Instrument and Control:

URANUS offers measuring devices, instrumentations, apparatus and solutions for industrial process engineering. We provide process solutions for flow, level, pressure, analytics, temperature, recording and digital communications, and optimizing processes in terms of economic efficiency, safety and environmental impact.

The offered services are applied for different types of industries, including chemical, food & beverage, life sciences, power & energy, primaries & metal, oil & gas and water & wastewater services and solutions for industrial process engineering.

6. Heavy Duty Trucks:

We supply a wide range of heavy duty trucks, Rear Loading Compactors Systems Garbage Trucks, sweeper, Buses, Special Trucks, Engines and their sets spare parts and special chassis. All these have generated variety models comprising heavy duty truck, medium duty truck, and light duty truck, mining dump truck, special-purpose vehicle and bus.

We provide the best and complete supply of products for our customers, to satisfy the demands of our customers and provide a new and super service.

Our good reputation comes from our previous works and our efficient relations with the international firms. These firms have been selected carefully based on their activity in supplying, high quality materials and equipment, with terms of trade in the commercial process.

URANUS through the past few years has signed many contracts with different ministries and their companies.

We are quite serious to develop our company and its performance in very near future with many international suppliers and manufacturers, engineering and contracting companies, to adopt a sort of agreement as to be their partners.

Our desire is to activate the Iraqi economy and to connect the companies with the end users to satisfy their benefits and tasks.
